RESCUE, REHABILITATION & RE-HOMING

Learn about rescued horses

HorseWorld rescues neglected and mistreated horses, ponies and donkeys, nursing them back to health before finding loving new families for each animal. **Find out how they do this by booking a talk today!**

Case Studies include **Daphne** and her foal **Squiggle** – saved from certain death; **Bambino** – overworked, harshly treated and just a baby; **Jumble** – abandoned because of his looks and **Victor** – illegally grazed and left on waste ground.

We can tailor the presentation to the needs and wishes of your group – from schools and colleges to Women's Institute, Rotary, Probus, Social Clubs and even coffee mornings! No group is too big or small! We provide a knowledgeable speaker with a visual presentation and bring all our own equipment.

Talks are free for schools!

Special "Caring for Animals" presentation by Horace the Horse is available!

Complete the form and book your talk today!
